

MODEL: NH-600LFS/900LFS STRAIGHT LINEAR FUSING PRESS MACHINE

Features:

1. Big diameter pressure roller is equipped, increase pressure balance, fusing quality, durability.
2. New upper heater increase heating efficiency, decrease heat loss.
3. By select heater control switch, the temperature of the upper and lower, front and rear heaters can be easily controlled.
4. The seamless belt has been adopted to increase the durability of the belt.
5. The air pressure system adopted to make simple adjustment and correct pressure.
6. The puckering prevention roller is equipped. The position of the roller can be adjusted easily to apply for any material.
7. Optional configurations: cooling fan device.
8. LFS are equipped with rotary strip off device as standard.
